EDUCATION

CONCORDIA UNIVERSITY • MASTER OF COMPUTER SCIENCE

Montreal, Quebec • Jan 2026 – Present

UNIVERSITY OF WINDSOR • BACHELOR OF SCIENCE IN COMPUTER SCIENCE (HONOURS)

Windsor, Ontario • Sep 2020 – Apr 2024

Awards: Student Access Bursary Recipient, In-Course Scholarship Recipient (three times), Dean's Office Scholarship

SKILLS

PROGRAMMING LANGUAGES: Python, JavaScript, Java, C, HTML5, CSS, PHP.

FRAMEWORKS AND LIBRARIES: Node.js, Vue.js, Bootstrap, Flask, scikit-learn, NumPy, Pandas.

DATABASES AND APIS: MySQL, MongoDB, REST, GraphQL, SOAP.

DEVELOPMENT TOOLS: Git, Docker, Linux, Jupyter, Google Colab.

CONCEPTUAL SKILLS: API services, machine learning, object-oriented programming, unit testing, Agile.

EXPERIENCE

CONCORDIA UNIVERSITY

Montreal, Quebec

Research Assistant | *Transcranial Ultrasound & Ventricle Segmentation*

Jan 2026 – Present

- Designed and implemented a machine-learning pipeline that segmented the lateral ventricles – the target structure for a ventriculostomy catheter – from paired transcranial **ultrasound** and **MRI** scans across 8 patients using the **nnU-Net** architecture.
- Engineered an end-to-end 3D deep-learning pipeline for automated lateral-ventricle segmentation in transcranial ultrasound using **PyTorch** and **MONAI**.
- Curated and annotated an 8-subject dataset of paired 3D **ultrasound** and co-registered **MRI** scans, and benchmarked zero-shot **ultrasound** foundation models (UltraSAM and SAMUS) against it.

ORACLE NETSUITE

Toronto, Ontario

Technical Support Analyst | *SuiteCloud & SuiteBuilder*

Oct 2024 – Present

- Debugged and resolved **SOAP** and REST API integration failures to restore real-time data flow between systems.
- Troubleshoot and debugged **SuiteScript** 1.0 and 2.x customization scripts, and for simpler issues wrote and delivered working code directly to customers for faster resolution.

BETTERMODE

Toronto, Ontario

Software Engineer Intern | *Slack Integration Optimization*

Jun 2023 – Sep 2023

- Improved software flexibility by introducing independent channel and webhook connections, enabling greater customization.
- Redesigned a backend architecture in **Node.js** using **modular design patterns**, cutting setup time by **20%** and improving deployment reliability.
- Developed a **Slack** integration for the BetterMode web application, enabling businesses to connect their BetterMode community with their **Slack** workspace.

UNIVERSITY OF WINDSOR

Windsor, Ontario

Teaching Assistant | *Python, Intro to Algorithms*

Sep 2021 – Apr 2024

- Mentored students in **Python** programming and **software design patterns**, strengthening their algorithmic problem-solving skills.
- Led weekly labs and office hours, providing one-on-one support that improved average student performance.

PROJECTS

RESUME ASSISTANT

Sep 2026 – Present

- Designed and developed a software tool that parses past resumes into a deduplicated **SQLite** data store of reusable resume bullets.
- Implemented SQL triggers to enforce data provenance, ensuring every generated line traces back to a stored source record or the system halts.
- Developed a software pass that converts legacy project folders into reviewable entries without requiring a model to read the underlying code.
